

OSHA HazCom / GHS Pictograms

As of 2012, OSHA aligned its Hazard Communication Standard (HazCom) with GHS. All hazardous chemical manufacturers must include GHS pictograms on their SDS's and on their product container labels effective June 1, 2015. The GHS pictograms depict a black hazard symbol on a white background surrounded by a red diamond border. A chemical's hazard classification determines which of the below pictograms appear on its respective label. As of December 1, 2013, all HazCom Standard covered employers are required to be trained on the following new pictograms and other GHS label elements.

Health Hazard

Aspiration Toxicity
Carcinogen
Mutagenicity
Reproductive Toxicity
Respiratory Sensitizer
Target Organ Toxicity

Flame

Emits Flammable Gas
Flammables
Organic Peroxides
Pyrophorics
Self-Heating
Self-Reactive

Exclamation Mark

Irritant (Skin & Eye)
Acute Toxicity (Harmful)
Narcotic Effects
Skin Sensitizer
Respiratory Tract Irritant
Hazardous to Ozone Layer
(Non-Mandatory for HazCom)

Corrosion

Skin Corrosion / Burns
Eye Damage
Corrosive to Metals

Gas Cylinder

Gases Under Pressure

Exploding Bomb

Explosives
Self-Reactives
Organic Peroxides

Skull & Crossbones

Acute Toxicity
(Fatal or Toxic)

Flame Over Circle

Oxidizers

Environment (Non-Mandatory for HazCom)

Aquatic Toxicity
